Welcome to the OpenStack wiki

The OpenStack Mission is to produce a ubiquitous Open Source Cloud Computing platform that is easy to use, simple to implement, interoperable between deployments, works well at all scales, and meets the needs of users and operators of both public and private clouds.

OpenStack is **open source** ^[1], **openly designed** ^[2], **openly developed** ^[3] by an **open community** ^[4].

The **OpenStack wiki** is a collaboration tool for the community to publish various documents in a collaborative manner. Content may be out of date or inaccurate. Please refer primarily to other OpenStack websites for reference information (see below).
